

Ron's Feedback

They get a specific percentage if they ship a product from their warehouse

Direct commission

Warehouse commissions (consignment)

Buy/Sell

Do we need to send out invoices?

Damaged, on hold, etc. captures statuses

Any orders that are consignment should generate a fulfillment request

Uploading the order, you should be able to mark products as consignment or not

Searching for the product you should search by category, description, part numbers, etc.

Pick the closest warehouse based on the customer/end user address

They need to send a copy of the order and the signed pick up ticket to the manufacturer
